June recorded slightly lower traffic volume but stronger visit quality. This softer volume is consistent with the seasonal pattern typically seen at this time of year, as warmer weather, outdoor plans, and the start of the holiday period can reduce demand for indoor entertainment.
Estimated sessions decreased by 4.0% and unique visitors by 4.8%, while average session duration increased to 3m33s (+27.5%) and pages per session rose by 5.0%.
Reservations decreased by 10.2%, with 12 of the 13 fewer reservations attributable to birthday bookings. Website sales also declined by approximately 10%, reaching €4,005. Karaoke reservations remained virtually stable at 109 (-0.9%), confirming that demand for Neoon's main bookable experience remained consistent despite the seasonal slowdown.

**Birthday reservation note:** June birthday reservations were directly affected by the operational change in birthday room availability. With birthday room 2 blocked, Neoon now has only one birthday room available. In addition, weekend morning birthday time slots are no longer available. This has a significant impact on birthday reservation volume and means that normal birthday reservation levels are expected to remain materially lower than in previous months.

## Overall Summary

June delivered a solid overall performance despite the expected seasonal slowdown. Social visibility remained strong, Meta Ads efficiency improved, and website visit quality increased. Reservations and sales softened mainly due to reduced birthday availability, while karaoke demand remained stable.

Returning to the €5,000 monthly sales mark continues to be challenging, although this may be partly linked to the seasonal transition into summer. Looking at last year's performance, the same period also recorded softer website sales, suggesting that the slowdown may follow a recurring seasonal pattern, as outdoor plans and warmer weather typically affect demand for indoor entertainment.

**Next Steps**

- Improve Stories communication through more video, motion-based designs, questions, polls, and interactive formats, reducing reliance on static photos.
- Promote karaoke more consistently through content and stronger Story interaction, with the goal of bringing monthly website sales back to around €5,000.
- Build on simple, timely Stories linked to relevant events, following the strong performance of the Portugal match Story, which reached almost 2,000 views.
- Promote cocktails and position Neoon Space as a fresh indoor destination during warmer days.
- Test weekly rewards on lower-volume days, including surprise merch for the best score, milestone customers, birthdays, bookings, or mini-challenge winners.
